

Case Study: IPME

Who: [The International Port Management Enterprise \(IPME\)](#)

manufactures, rents, and sells shipping containers for clients in North America and beyond. IPME also custom designs permanent and temporary shipping container structures to create mobile marketing event structures.

Need: IPME needed eco-friendly metal bottles that were both affordable and sustainable. As there was an opening arranged for the company to do a hotel drop, they needed a quality item that would arrive on time to represent their brand and respective brand values.

Solution: Eco Promotional Products worked with IPME to select an aluminum bottle with bamboo lid. This bottle features a screw on spill resistant lid finished with a unique bamboo design which fulfills IPME's emphasis on sustainable products to represent their green business.
