**WORD  
SEARCH  
CHALLENGE**

*A Sharper Mind is Minutes Away!*

**Your  
Imprint  
Here!**

The background features a large, faint gear outline in the center. Scattered around are smaller gear outlines and a pattern of small dots, some solid and some hollow, creating a technical or mechanical theme.

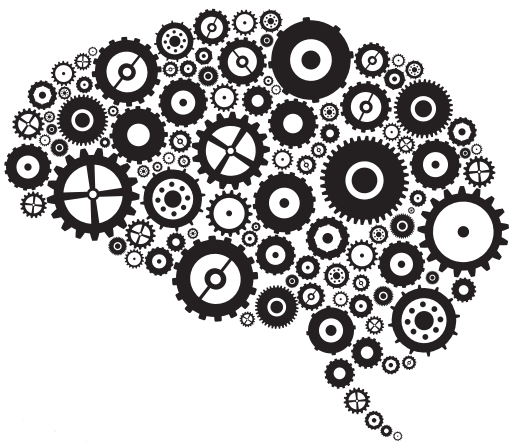

# WORD SEARCH CHALLENGE

## THE IMPORTANCE OF A SHARP MIND

There are countless sayings, adages and aphorisms involving the human brain. The mind is a terrible thing to waste, being the most prominent and poignant, speaks directly to the importance of keeping the brain active. But how, exactly, does one keep the brain active?

It's not as if there's a little barbell set out there for the brain. Your brain isn't doing sit-ups and squats. So, how do you train the brain? Knowledge is the answer, of course, but let's be honest: Reading books and doing math problems can be very tedious and boring. Most of us cannot wait until we're out of school; we're in no hurry to jump right back in. That's why brain games are always a great idea – those little fun-to-do mental exercises that keep your brain sharp and your senses alert.

Brain games can actually wake up parts of the brain that are typically dormant in day-to-day life.

The background of the page is white with a decorative pattern of grey gears and dots. The gears are of various sizes and are scattered across the page, with some larger gears in the top right and bottom right corners. The dots are small and scattered throughout the page.

## THE BENEFITS OF SHARP MIND GAMES

One of the biggest things you learn by solving puzzles of all kinds is the ability to think outside of the box for a solution. This type of thinking literally hardwires the brain to solve tougher problems by examining more than what's typically confined in the narrow scope of problem-solving.

Being mentally sharp and actually exercising the brain helps in many areas. For starters, it helps neurons to fire faster, more frequently, and thus help you make quick work of everyday problems.

Staying sharp and training the brain also increases your overall intelligence. Ever wonder why those super-smart people are so brilliant? What's different about their brains from an average person's brain? It's the ability to absorb and understand knowledge. A trained brain retains knowledge and builds pathways for the recollection of answers.

You may never be trapped on the 85th floor with only 20 feet of rope, a tennis shoe and a pocket knife, but if you are, the sharp mind can craft an out-of-the-box way out of that situation, whereas the dull mind has very limited options.

## HOW TO PLAY

Word searches are a fun way to improve your spelling, build your vocabulary, and speed up word recognition. Plus they are fun and relaxing!

To do a word search you will need to look forward, backward, up, down, and diagonally to find the hidden words. Once you find a word, highlight it with a highlighter or circle it neatly with a pen or pencil. Then cross the word off the list of words to find.

### Helpful Tips:

- Scan over the list of words before you start so that you can be on the look out for more than one word at a time.
- Scan the rows of letters looking for the first letter of the word you are trying to find. Once you spot it, do a circle search around the letter for the next letter in the word.
- Circular letters are the easiest to find, so you may want to start looking for words with letters like Q, O, and D first. Unusual letters like X and Z also stand out.
- When scanning watch for familiar letter combinations like "st," "th," or double letters.

*Anyone who stops learning is old,  
whether at twenty or eighty. Anyone who  
keeps learning stays young. The greatest  
thing in life is to keep your mind young.*

—HENRY FORD
